

There's a whole world out there

Integrative and Functional Nutrition (IFN) & Private Practice:

Apply IFN and Vision to Your World

Objectives

- 1. Understand the benefits, freedom, and complexities of building a private practice
- 2. Understand the basic premise of Integrative and Functional Medicine and Nutrition (IFM/N)
- 3. Be able to identify ways to implement IFM/IFN in the area of dietetics you practice in

Integrative Clinical Dietitian at two primary care facilities

- Books (see LIVE examples)
- Colleagues, mentors, clients
- Google
- Mistakes
- Competition

- YOUR VISION, YOUR DREAMS, THINGS THAT INSPIRE YOU

Integrative medicine is a practice of medicine that reaffirms the importance of the relationship between practitioner and patient, focuses on the whole person, is informed by evidence, and makes use of all appropriate therapeutic approaches, healthcare professionals, and disciplines to achieve optimal health and healing.

http://www.imconsortium.org

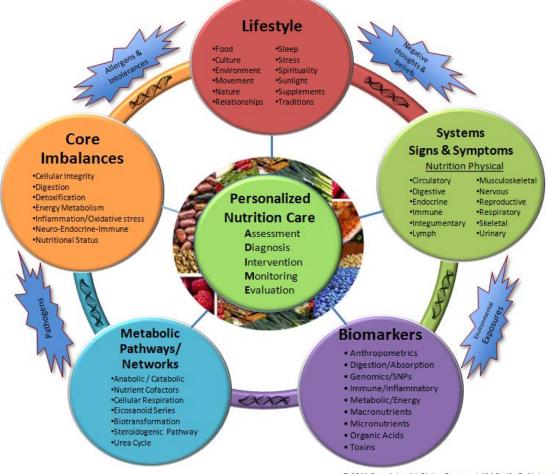

"Functional medicine addresses the underlying causes of disease, using a systems-oriented approach and engaging both patient and practitioner in a therapeutic partnership."

Institute for Functional Medicine

Integrative & Functional Medical Nutrition Therapy (IFMNT) Radial

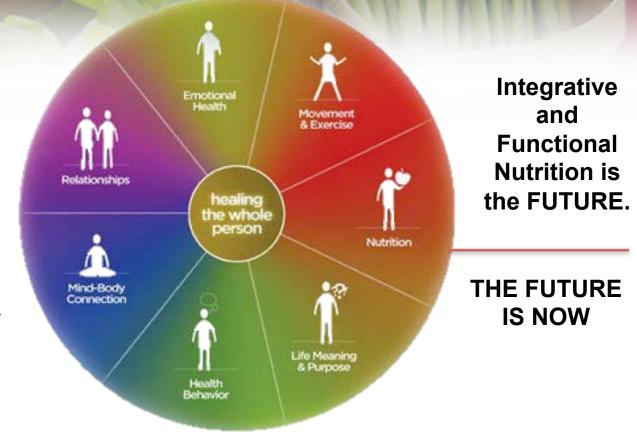

We *are* the nutrition experts that deliver accurate information, interpret the complex science of nutrition, educate, and holistically care for our patients and clients. We are the leaders.

Integrative and Functional Nutrition is the FUTURE. The FUTURE is NOW.

It's asking more questions, looking for more answers, and peeling back those layers:

Who else can I consult? Collaborate with?

What other resources, references, or tools do I need to access?

Is my client/patient getting enough: Sleep, social interaction, quality of life?

What barriers are impeding my client's/ patient's success?

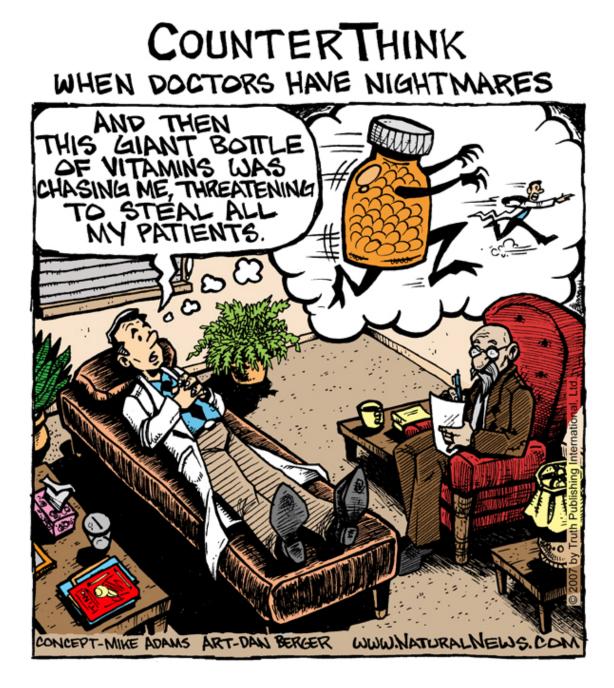

Environmental barriers, finances, work hazards, my own expectations/bias?

INTEGRATIVE MEDICINE IN AMERICA

How Integrative Medicine Is Being Practiced in Clinical Centers Across the United States

Academy 2012 Visioning Report for Dietetics Education, Credentialing & Practice:

"The Academy's vision is to have RD(N)s recognized as the leaders in food and nutrition. In reality, *the profession faces considerable competition and encroachment from other disciplines with an interest and stake in food and nutrition* (p.20)."

Academy 2012 Visioning Report for Dietetics Education, Credentialing & Practice:

"The article suggested that dietetics practitioners *reinvent themselves* to maintain relevance by being adaptable, taking risks, and avoiding what is termed "perfection paralysis" which will get the profession nowhere (p. 6)."

"Change is a constant and the profession must prepare for continued change in the future by *defining, recognizing and supporting multiple levels of practice in a variety of practice* areas to meet marketplace demands (p. 6)."

The FUTURE is NOW.

Scope of Practice

"RDs are skilled in functional and integrative medicine, nutritional genomics, whole foods, nutrition supplements and dietary supplements, and utilizing the NCP in a broad range of holistic and therapeutic modalities (p. S24)."

Do **YOU** feel skilled in each of these areas?

Integrative And Functional Nutrition

We *are* the nutrition experts that deliver accurate information, interpret the complex science of nutrition, educate, and holistically care for our patients and clients. We are the leaders.
